

Dear Potential Sponsor,

CS @ Illinois is among the top 5 computer science programs in the nation and has always been known for its motivated students. This year we are creating HackIllinois, the first student run hackathon at the University of Illinois at Urbana-Champaign. Between 500 and 1000 of the best hackers from all over the midwest will travel to Illinois in April 2014 to spend 36 hours straight building anything they can dream of.

Sponsoring HackIllinois is a great way to get involved on our campus and have access to bold computer science students who love to hack. By sponsoring you can:

- Demo your APIs to hundreds of students and see them integrate it into projects
- Establish a personal relationship with top hackers
- Get early access to participant resumes
- Mentor participants with on-site engineers and encourage the best with a company-branded prize

Attached is a sponsorship tier list with information about how you can support HackIllinois. Any questions? Contact us at [sponsor@hackillinois.org](mailto:sponsor@hackillinois.org).

Planning a hackathon is a large undertaking. With your backing we can inspire the next generation of engineers and spawn amazing ideas. We look forward to working with you to make HackIllinois a reality!

Thank you,  
HackIllinois Team
